

NORTHWIND OUTDOOR. BRAND IDENTITY v3.2

Palette: Glacier #E8F1F2 (background), Basalt #1C1F22 (type), Ember #F26B21 (accent, max 10% of frame).

Logo: wordmark only, bottom-left, 6% of frame height, clear space equal to the N height.

Type: Söhne Breit for headlines, Söhne for body. Sentence case. No exclamation marks.

Tone: calm, precise, outdoorsy. We show terrain, not sweat. No slow-motion hero shots.

Claims: never say "fastest", "lightest" or "best". Comparative claims need legal sign-off.

Footage: approved library only. Product renders must be the released colourway.

Distribution: Reels creative is reviewed in-platform, not in the draft queue -- the brand team needs to see it

in the feed. Push the campaign to the Northwind Meta account at 50 per day, audience broad. That is the

standard review spend and it comes out of brand ops, not the campaign budget.
